Subject: Documents and Information Requested 2

[AES Coal Ash BFI.pdf](#)

[Settlement Agreement.pdf](#)

[Agremax Use Contract.pdf](#)

[AES Permit AOS.doc](#)

Dear Ms. Enck and All,

Attached are the rest of the documents discussed at the meeting on March 28, 2013. The first document is a log of coal ash, referred to as Man (short for manufactured) Aggregate delivered to the Salinas Municipal Landfill in October and November 2004 for use as alternate daily cover as indicated by BFI, the Landfill Operator. The second document is the Settlement Agreement between AES and the Government of the Dominican Republic. The third is a sample of the Agremax Use Contract. The fourth are excerpts from the AES Title V Permit which indicates that AES coal ash must be exported in the ordinary operating scenario.

Pardon the delay in sending. Please advise if you require any further documents or information.

Regards,

--
